

Home Terminal

The Home Terminal represents the central access point, where people live their lives.

Installation where you are at home

Home Terminals have been designed for use in homes, apartment buildings, residential areas, and communities. They are frequently installed in areas that are accessible to all authorised users. This ensures that packages can be picked up when leaving or returning home.

The Home Terminal can also be used for distribution of internal document post.

Product features

- Safe deposit of ordered goods and documents
- Added value for tenants/homeowners
- Available round the clock
- Easy returns
- Tailored solution that facilitates online purchasing.

1_Home Terminal with 6 compartments

Home Terminal

3_Home Terminal with 14 compartments

Extension	Module with 15 compartments can be added.
Includes	Integral control unit with 8" touchscreen, barcode- + NFC reader
Power	Input voltage: 220 V, consumption: 0.54 kWh
Weight	Approx. 205 kg
Dimensions*	Height 1830 × Width 960 × Depth 420/580 mm

Compartment**	S	M	L1	L2	XL
Height (mm)	60	150	320	325	690
Width (mm)	380	380	380	380	375
Depth (mm)	395/550	395/550	395/550	395/550	395/550

Facts

Colours

24/7 Smart Terminals are now even more durable, thanks to a special powder and anti-graffiti coating. Terminals are available in over 200 RAL colours.

Prerequisites: Technology/location

- Level and accessible surface (ideally a foundation).
- Power supply
- Internet access via cable, Wi-Fi or radio (SIM card) 3G, 4G.

Outdoor location

A roof is also available for outdoor use. The roof prevents damage from rain, hail, etc.

Safety opening for large compartments

Large compartments can be opened from the inside in the event of emergency.

Service and support

Purchasing our products means opting for a continuous and trustful cooperation. Professional customer service, customer care, and efficient service, are provided as standard at Kern. This means that the Kern Group is available to its customers all over the world and around the clock, via its representatives.

Personal on-site consultancy

Consultancy takes place on site, so that an optimal and customised solution can be identified and developed.

Needs analysis

Customer needs are of the highest priority. Only thanks to the experience and knowledge gained from customers, a "tailor-made" solution can be found.

Installation

24/7 Smart Terminals are installed by the Kern team or a locally-based partner. This ensures a trouble-free installation process.

System integration

The system is controlled as standard with Kern software. If existing programs are available, easy integration is possible via interfaces.

On-site employee training

Employers are trained on site. This ensures smooth handover and a uniform level of knowledge of the chosen system.

Comprehensive support during operation

Should questions or feedback about the terminals arise, the Kern team is available at all times to provide service and support.

Reliable service programme

The combination of 24/7 customer service and service level agreement provides an optimal service.
